Subject: Water Quality Symposium announcement - American Chemical Society 2019 Fall Meeting (abstract deadline March 22nd)

California Water Quality Monitoring Council

National Water Quality Monitoring Council

Working together for clean water

Safeguarding Water Quality in a Climate of Change

A Division of Environmental Chemistry Symposium at the Fall 2019 American Chemical Society National Meeting (San Diego, August 25-29, 2019)

Submit Abstracts [HERE](#). Deadline is March 22nd, 2019.

Description:

The symposium, organized by members of the US Global Change Program's Integrated Water Cycle Group, welcomes submissions on emerging water quality issues, across a range of scales (local to global) and settings (freshwater to marine), and how these issues might be affected and potentially exacerbated by the processes of global change (e.g. climate, sea level rise, landscape change, large scale hydrologic alteration, ecosystem change, etc). This session will explore water quality as an issue critical to national, economic, environmental, and public health security and highlight integrative, innovative water research needed to holistically understand emerging local and regional water quality issues in the face of changing climatic, environmental, and human system dynamics. We invite submissions from across the spectrum of science, technology, policy, and management that advance understanding of emerging issues and/or highlight solutions to challenges to safe, secure, and sustainable water quality, now and in the future.

Abstract submission:

Abstracts can be submitted online at: <https://callforpapers.acs.org/sandiego2019>. The submission system **closes on March 22nd**. Submit by selecting "[ENVR] Division of Environmental Chemistry" as the Program Type and "Safeguarding Water Quality in Climate of Change" as the Symposium.

Additional information:

Additional meeting information is available at: <https://www.acs.org/content/acs/en/meetings/national-meeting/abstract-submission.html> . Please contact the session conveners with any questions, suggestions, or ideas: Jessica Moerman (Jessica.Moerman@science.doe.gov) and Jennifer Saleem-Arrigo (jsaleemarrigo@usgcrp.gov)
